Vegam Typeface (Malayalam)

Vegam (speed) is a dynamic and modern Malayalam typeface designed with speed and motion in mind. With a 60-degree slant, it embodies the essence of energy, agility, and futuristic aesthetics. The unique contrast one side sharp and the other side curved creates a striking visual balance, making it perfect for sports branding, technology interfaces, and expressive typography. This font draws inspiration from sports cars. The idea was to create a typeface that reflects the essence of motion while maintaining readability and typographic elegance. This was created during my letter design course.
