Arul Typeface (Tamil)

Created during Letter Design Course, Arul is a display typeface that balances grace with movement.

"Arul," meaning grace or divine blessing, is a display typeface that balances elegance with movement.

Its distinctive slanted structure adds a natural rhythm, making it feel both dynamic and refined. While not strictly geometric, Arul blends modular precision with organic flow, achieving a structured yet expressive form.

Designed with a contemporary sensibility, Arul seamlessly bridges tradition and modernity, making it an excellent choice for graphic designers, cultural publications, and branding projects.
