Kumba

Kumba is a typeface I created during my letter design course, inspired by circular forms that evoke warmth, inclusivity, and familiarity. The name “Kumba” has a dual meaning in Malayalam — ‘home’ and ‘tummy’ — both of which connect deeply to the typeface’s design and emotional essence.

A home is a place of security, comfort, and belonging, much like the feeling evoked by the smooth, rounded letterforms of “Kumba.” Similarly, the organic shape of the stomach symbolizes nourishment and life, reflected in the typeface’s well-balanced structure and gentle curves. These elements come together to create a typeface that feels inviting, stable, and harmonious.

Designed to convey both modern elegance and a sense of warmth, “Kumba” is suited for display typography, branding, and editorial design. Its consistent proportions and fluid forms make it visually engaging while maintaining readability.
