ਨਿਸ਼ਾਨ

'ਨਿਸ਼ਾਨ' (Nishaan) — or in English, 'mark' — is a Gurmukhi typeface intended for display text (book covers, movie posters and the like). Subtly reminiscent of stone-carved scriptures from times long gone, its free-flowing curves give it an organic touch — yet its relative thickness lets it retain a level of authority. Depending on how it's presented (colour, size, accompanying elements, etc.), it can communicate a range of emotions.
